

INSTRUCTION MANUAL

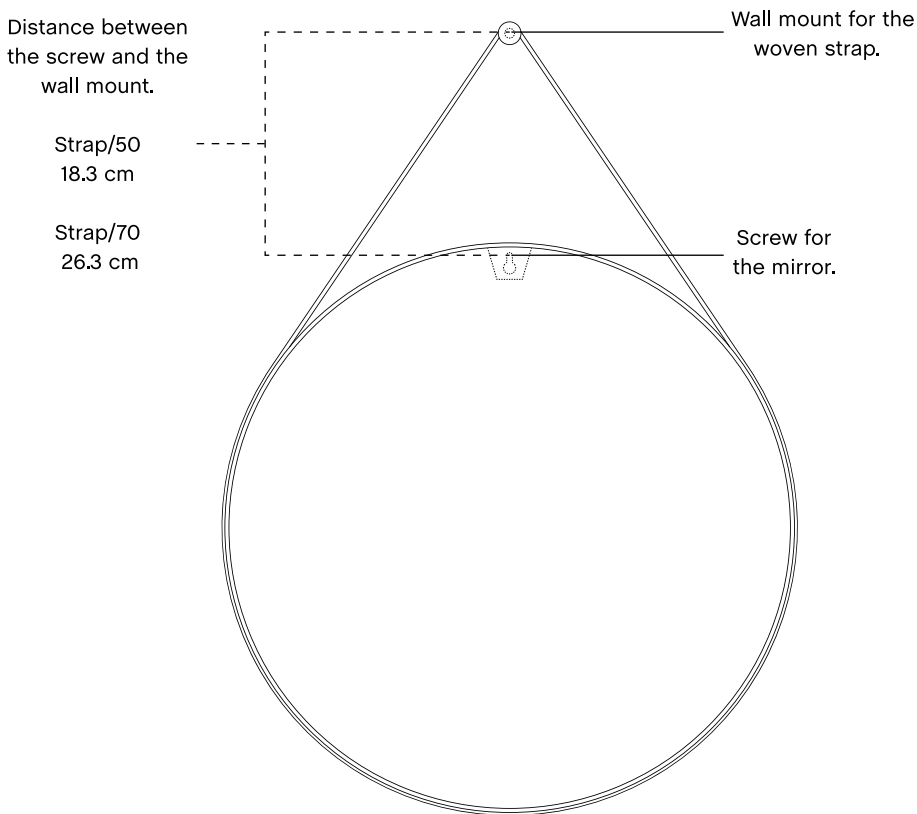

STRAP MIRROR NO 2.

HAY

As Strap/50 and 70 are heavy mirrors, we advise you to secure them with an extra screw in the wall mount on the back of the mirror. After the wall mounts have been attached, place the mirror on the screw, before finally placing the woven strap around the mirror and the wall mount.

Screws and wall plugs are not provided. Please identify your wall type before mounting and use suitable fastening hardware. If in doubt, consult a professional.
