- Suitable for a wide variety of private and public environments

FACET CABINET DESIGN BY STEFAN SCHOLTEN

Designed for HAY by Stefan Scholten, Facet is a multifunctional storage cabinet that is easy to move around. Made from minimum 30% post-consumer recycled ABS, its sleek, faceted design is now available in two new colours – burgundy and mint – adding fresh character to the existing range. Featuring a revolving integrated door and optional castors, its visual appeal and versatility enable it to adapt seamlessly to any indoor space.

Dutch designer Stefan Scholten is known for his reductionist style and unique use of colour, and uses the 'atelier' method of working, combining functionality with an expressive, original design on diverse projects worldwide.

High-gloss

Soft mint
High-gloss

Facet Cabinet consist of recycled post-consumer ABS. The use of recycled material means that colours may vary slightly from batch to batch and between parts. Marks and irregularities on the surface are a natural part of the recycled material and may occur. Exposure to the sun/UV will fade the colour over time.

Applies to cabinet without castors or feet

SUSTAINABILITY

HAY focuses on developing long-lasting products that minimise the environmental impact throughout their lifecycle. We prioritise carefully selecting materials, such as recycled content, FSC-certified wood, and water-based lacquer, while continuously increasing the number of eco-certified products. We adhere to strict regulatory requirements, and the majority of our products are tested to meet international standards for strength, durability, and safety.
