

# FLUID PENDANT LAMP – EU VERSION

CLAESSON KOIVISTO RUNE ON THE DESIGN “We wanted to give the lamp a form with a certain softness, towards a more natural language and further removed from pure geometry. Fascinated by the way that surface tension governs the curvature of a resting water droplet, we have tried to capture it’s essence. The subtle irregularity of Fluid means that their silhouette gently changes depending upon the viewing angle. It also brings a greater light intensity to the lamps’underside - just where you need it.”
