

DESIGN BY HEE WELLING

HAY

HEE COLLECTION

HIGHLIGHTS

- Part of a multifunctional family of chairs, lounge chairs and bar stools in a variability of colours
- The Hee collection features a weatherproof outdoor powder coating and a hot dip galvanised finish
- Can be linked together in rows for conference use
- Bar Stools are stackable on floor up to 10 pcs.
- Chairs are stackable on floor up to 15 pcs.
- Lounge Chairs are stackable on floor up to 20 pcs.
- Suitable for a wide variety of private and public environments

HEE COLLECTION DESIGN BY HEE WELLING

The philosophy behind the Hee Series was to take an archetypal chair and perfect it to the last detail, with the goal of creating a contemporary chair that could fit into a wide range of contexts. Like a line drawing, Hee wraps metres of metal wire into neat, straight lines in three versions: bar stool, lounge chair, and dining chair. Stackable and weatherproof, the chairs' functional design combined with its choice of powder coated colours and hot galvanised steel variants make the series suitable for numerous indoor and outdoor contexts in both public spaces and home environments.

Hee Welling is a Danish furniture designer who founded his own studio in Copenhagen in 2003. The son of a cabinetmaker, Welling's fascination with production techniques, materials, and machinery was fired as a child. He went on to study at The University of Art and Design in Helsinki, and received his master's degree in furniture design from The Royal Danish Academy of Fine Arts. Centred around the idea of creating technically accomplished products that can reach a wide audience, his designs are characterised by a great sense of proportion and quietly elegant aesthetics. Welling has received a number of design awards, including the Bo Bedre Award (Denmark), Good Design Award (USA), and has been nominated as Danish designer of the year in 2013 and 2014. For HAY, Welling has designed the About A series and the Hee Chair, Lounge Chair, and Bar Stool.

SUSTAINABILITY

HAY focuses on developing long-lasting products that minimise the environmental impact throughout their lifecycle. We prioritise carefully selecting materials, such as recycled content, FSC™-certified wood, and water-based lacquer, while continuously increasing the number of eco-certified products. We adhere to strict regulatory requirements, and the majority of our products are tested to meet international standards for strength, durability, and safety.
