- Available in a variety of sizes and selected soft textiles
- Removable headboard cover
- HAY recommends using Standard Bed Slats with Tamoto Bed
- Suitable for a wide variety of private and public environments

TAMOTO BED

DESIGN BY SHANE SCHNEK

Developed for HAY by Shane Schneck, Tamoto Bed is designed with multifunctionality in mind, which makes it easy and intuitive to integrate into a modern lifestyle. Tamoto is influenced by the draping quality of kimono sleeves, which inspired Shane's innovative use of folding fabric over the bed's frame. The soft, draped headboard is counterbalanced by the generously dimensioned steel tubing frame, creating a contemporary and comfortable bed-sofa hybrid that is not intended exclusively for sleeping, but also as a foundation for reading, working, or watching TV and other activities. With a flat-packed, easy-to-assemble design, removable headboard cover and recyclable materials, functionality has been factored in every step of the design process. Available in a variety of sizes and selected soft textiles, Tamoto is a versatile bed that fits most size bedroom and design styles.

Shane Schneck is an American designer based in Sweden, where he founded his Office for Design studio in Stockholm in 2010. International in his attitude and outlook, he previously lived and worked in Milan with the Piero Lissoni studio. His work has received international recognition, winning Red Dot, iF and Wallpaper design awards. His design ethos is to create simple yet innovative products that challenge industry standards. His products often contain an element of surprise, or are somehow playful or bold in their conception. Perhaps in their colour, form or use of materials. For HAY, Schneck has designed Cap, Rhom Trivet, Lup, Analog, Field, Porter, Bowler, Butler, Bernard and Tamoto Bed.

SUSTAINABILITY

HAY focuses on developing long-lasting products that minimise the environmental impact throughout their lifecycle. We prioritise carefully selecting materials, such as recycled content, FSC-certified wood, and water-based lacquer, while continuously increasing the number of eco-certified products. We adhere to strict regulatory requirements, and the majority of our products are tested to meet international standards for strength, durability, and safety.
